Subject: Jordan River Water Use Plan Order Review – Draft WUPOR Report Review

I am writing regarding BC Hydro's Jordan River Water Use Plan Order Review (WUPOR) and to invite your review of and comment on the draft *Jordan River WUPOR Report*.

The report is posted on bchydro.com on the Jordan River WUP Order page:

- Jordan River WUP Order URL: https://www.bchydro.com/about/sustainability/conservation/water_use_planning/vancouver_island/Jordan_river.html

Please submit your comments by June 17, 2018 to:

Doug Johnson
BC Hydro
3100 – 35th Ave, Suite #211
Vernon, BC
V1T 2T1

Or by e-mail to: WUPOR@bchydro.com (Subject: draft *Jordan River WUPOR Report*)

Comments received on the draft *Report* will be reviewed and assessed to update and complete the *Report.* It is anticipated the final *Report* will be submitted to the B.C. Comptroller of Water Rights by October 2018. The comment period is currently open for 30 days, ending June 17.

Stage Two Draft WUPOR Report

The Stage Two (Figure 1) draft *WUPOR Report* is open for a 30-day review period from May 18 to June 17, 2018. This report provides a comprehensive review of BC Hydro's ordered implementation of the Jordan River Water Use Plan (WUP). The *Report* also includes draft recommendations for future ordered activities and facility operations. BC Hydro will document, review, and assess all comments received in the context of potential changes to the *Report*, including the recommendations. When complete, the *Report* will be submitted to the Comptroller of Water Rights. If the Comptroller elects to change the Jordan River Order, BC Hydro will implement such changes as directed. This review is being conducted to fulfil BC Hydro's commitment to complete the 13 Steps of the provincial Water Use Planning Guidelines.

The draft WUPOR Report is based on and/or includes Jordan River's:

- 2004 WUP implementation Order issued by the BC Comptroller of Water Rights (CWR)
- 2002 *Consultative Committee Report*
- 2003 *Water Use Plan*
- Terms of Reference that were developed and approved by the CWR for each of the ordered WUP monitoring programs and physical works

- Program documentation and monitoring study reports
- Financial information
- Water conveyance reports and information
- *WUP Findings Report* (reviewed at Stage One of the WUPOR Review)
- *WUP Environmental Synthesis Report* (reviewed at Stage One of the WUPOR Review)
- Comments and recommendations from key stakeholders, regulatory agencies, and First Nations from the Stage One review

Please note: as a draft report, it is structured to reflect the entire engagement process. To date engagement has occurred with the earlier Stage One release of the Environmental Synthesis Report. The engagement sections in the draft WUPOR Report will be updated to reflect the current Stage Two engagement that is occurring during this 30-day review period, once this review process is complete.

Background

The comment period for the WUPOR Stage One draft *Environmental Synthesis Report* and final draft of the *Findings Report* closed on January 13, 2018 after a 60-day comment period. Comments received on these documents have been reviewed and used to guide completion of these reports. These reports have been used as input into developing draft recommendations regarding future Jordan River ordered activities and facility operations, as well as the overall draft WUPOR report.

Submission of Personal Information

Please note, if submitted with your response, BC Hydro is collecting your contact information and personal opinion on the Jordan River Water Use Plan Order to produce the draft and/or final versions of the reports noted above. This information is collected in furtherance of BC Hydro's mandate under the *Water Sustainability Act* and the *Hydro and Power Authority Act*. If you have any questions concerning how your personal information is handled, please contact Doug Johnson, at doug.johnson@bchydro.com (Subject: Collection of Personal Information) or 250.260.7213.

Sincerely,

Doug Johnson
WUPOR Program Manager
Generation System Operations
