Alec Merriman

When mine officials at Jordan River say earlier discharges of mine effluent into the waters at Jordan River left no ill effects . . . don't you believe it!

They left a biological desert on the beach at Jordan River — a dull grey beach where nothing moved, a sterile area.

What was a lively beach where seaweed flourished, crabs and other marine life crawled and swam became a dead area, and above the beach you could smell the sweet sickly smell of cyanide.

All the marine life along the beach where they dumped the effluent either died or went away — I don't know which.

I do know that after the mine started operating at Jordan River there were records of dead fish — coho and pinks — floating down the river.

But the Jordan River runs are pretty well gone now, except for a run of pinks which spawn in the even-numbered years.

Even they seem doomed, either by the new hydro development or the new mine proposals.

They used to spawn in the tailrace from the old powerhouse and water in that was unpolluted water from the mine. Now that tailrace has gone with new hydro construction. This year the pinks spawned in the main Jordan River.

Increased flows from the new hydro plant when it opens, or pollution from leaching effluent from holding ponds, will undoubtedly spell the end of that run of salmon. There was leaching from holding ponds in the old mine operation and more leaching can be expected from new mine operations.

And don't forget biologists and fishermen are still seeking reasons for declining salmon runs through Juan de Fuca Strait. Jordan River mine effluent may not be the reason, but it could be a contributing factor, and one which should be considered before any new argeements are made to allow new mine operators to dump effluent in Juan de Fuca Strait.

Dison Development, the company that has purchased the Jordan River mine from Cominco, has applied to the B.C. Pollution Control Board to dump one million gallons of mine tailings a day from the Sunro copper mine. It is proposed to use the same 4,600-foot-long pipeline, from the existing mill to the beach area in the Strait, that was used by Cowichan Copper.

Mine officials say the same pipeline was used on three separate occasions the mine was in operation between 1962 and 1968 and discharges left "absolutely no ill effects."

That statement bears a second look. Ask the people who watched the situation. This writer was one who watched the buildup to a sterile area on the waterfront.

Smale Records Fourth Straight Win

	W	L
British Columbia	4	0
Manitoba	3	0
Saskatchewan	2	1
Ontario	2	1
Northern Ontario	2	1
P. E. Island	2	2
Quebec	1	2
Alberta	1	3
New Brunswick	1	3
Newfoundland	0	3
Nova Scotia	0	4

TODAY'S DRAWS

Afternoon—B.C. vs. N. Ontario; Saskatchewan vs. Quebec; Manitoba vs. Alberta; Ontario vs. P.E.I.; Nova Scotia vs. Newfoundland.

Evening—B.C. vs. Quebec; Manitoba vs. P.E.I.; Saskatchewan vs. New Brunswick; Alberta vs. Newfoundland; N. Ontario vs. Ontario.

QUEBEC — Kevin Smale of Prince George is out in front after two days of play in the Canadian men's curling championship.

The British Columbia champion, now one of only two unbeaten skips, moved ahead Tuesday by scoring his third and fourth victories.

Close behind is Don Duguid of Manitoba, skipping the same rink which won the Brier Tankard last year. Duguid, who had a bye on Monday, also won twice on Tuesday and is at 3-0.

Dropped out of the unbeaten ranks in Tuesday's play was Saskatchewan's Bob Pickering, who was upset, 8-6, by Kip Ready of Prince Edward Island, and Northern Ontario, taken down, 11-7, by Saskatchewan in the afternoon draw.

Smale came through against two dangerous opponents, first breezing by three-time champion Matt Baldwin of Alberta, 16-7, and then pulling out an 11-9 decision over Prince Edward Island.

Aginst Baldwin, who is having nothing but trouble, Smale twice stole three points, the second three-ender following a four on the 10th end.

Ready proved considerably more difficult and the B.C. rink was in trouble all the way and up against it when the Islanders scored two on the 10th end to take a 9-8 lead. But Smale got two on the 11th end and managed to steal a point on the home end.

It was different for Saskatchewan, which had a one-rock lead starting home only to lose when Ready made a last-rock takeout to count two points.

The defending champions had an easy day of it. They started with a 10-6 win over Newfoundland's three-man crew, then followed by easing to an 11-6 win over winless Nova Scotia.

Newfoundland was still playing without vice-skip Les Bowering, who injured a knee on Monday. Bowering may be able to return to the lineup today.

The two Ontario rinks and Saskatchewan are within reach of the top, all having lost only once. Bill Teley's Northern Ontario crew took New Brunswick, 14-6, in the morning to get to 2-0 before the defeat to Saskatchewan.

Ontario, skipped by 24-year-old Bob Charlebois, scored four on an extra end to squeeze out a 14-10 morning victory over Nova Scotia, then made its record 3-1 by handing Baldwin his third loss in four games.

Big ends and steals continued to plague Baldwin. Ontario stole single points on the fifth and eighth ends and broke it open with a steal of four on the 11th end.

Saskatchewan was tied with Ontario after the afternoon draw, in which the Prairie rink spurted to an 8-0 lead and stayed in full control against Northern Onario.

Willie Signs On For Two Years

By THE ASSOCIATED PRESS

Willie Mays didn't say hey. He said OK, and by doing so the San Francisco Giants' veteran outfielder remained one of baseball's highest paid players.

The 39-year-old centrefielder, who had been holding out for a 10-year, $750,000 contract, settled for a two-year pact worth more than $300,000.

Frank Howard, the American League's home run and runs-batted-in champion last year, got an estimated $20,000 raise from Washington Senators as he inked a one-year, $140,000 pact.

Also signing were Ted Savage estimated $135,000 a year ago, didn't announce terms of the new contract but it was believed to be worth $155,000 or $160,000 a year. The 20-year-veteran batted .291 with 28 homers and 83 RBI in 1970.

"We have always kept Willie's contract the highest in baseball," said a club spokesman. "May be it still is."

Carl Yastrzemski recently signed with Boston Red Sox for an estimated $160,000.

Pinson is trying to get a $7,500 raise over his 1970 contract of $60,000.

He said he has asked Alvin

Rangers Obtain Rolfe

NEW YORK (AP) — New York Rangers obtained Dale Rolfe, 6-foot-4, 205-pound defenceman, and gave up forward Jim Krulicki and an undisclosed amount of money in another National Hockey League trade with Detroit Red Wings Tuesday.

Rolfe, 30, had three goals and nine assists in 44 games for Detroit this year. Krulicki, 22, used mainly as a penalty-killer, did not score and had two assists in 26 games for New York.

New Ford Pinto $2222.00

Import-priced! Yet, look what you get from Pinto you don't get from the leading import: more power (75 or 100 hp) . . . more room inside . . . easy, do-it-yourself maintenance . . . lots more!

Interception of salmon bound for one country by fishermen of another country is a problem faced by the fishing industry, but "the main fight for the survival of the salmon fishery will be staged at home."

That is one message Fisheries Minister Jack Davis gave this week to members of United Fishermen and Allied Workers' Union in convention in Vancouver.

"It will be a fight to preserve our rivers and streams in British Columbia istelf. Pollution from industry continues to present a serious threat to the fishery. But much more serious is the drive to produce more hydro-electric power on the Fraser and its tributaries," he said.

He said construction of the proposed Moran Dam would have catastrophic effects on salmon runs and would put an end, forever, to the hopes for a big increase in the rearing of young fish.

Nearly 70 per cent of the total rearing capacity on the Fraser lies upstream from Moran, he explained. Although the Thompson system below the proposed Moran Dam has been the main producer in recent years, it doesn't have the same potential for development, he added.

He promised to oppose "the construction of the great obstacle to the development of our west coast salmon fishery."

Because the Fraser River comes under two federal acts as a salmon river and as a navigable river he will be in a position to block the dam.

Davis said that over the next five years federal fisheries will spend $5 million to build five modern large volume hatcheries. Work has started on a $1.5 million hatchery on the Capilano.

These hatcheries will produce five to 10 times as many fish as may be produced under natural conditions. "This is one reason why I am optimistic about our catches of coho and spring salmon in this area in the late 70s and early 80s," he said.

"We are looking after our rivers better than United States is," he claimed. "We have put off building power dams on the Fraser for example. Now we are beginning to clean up many of our smaller streams on the coast. Our federal fisheries department, this winter for example, is spending hundreds of thousands of dollars employing native Indian people to clean up channels which formally produced salmon in the natural way."
