

ROBERTS IS A FREE MAN

Verdict of "Not Guilty"
Brought in By Jury
Last Night

Prisoner is Immediately Discharged—Announcement of Acquittal Received With Demonstrations of Approval

John Roberts, of Silverton, is again a free man. At 10.30 o'clock last evening, the jury in his case, after three hours deliberation, returned a verdict of "Not Guilty." The verdict was a popular one. Sheriff Tuck had some difficulty in repressing the demonstrations of the throng that had waited in the court room for an hour and a half to hear the end of a case that had lasted four whole days and engrossed the interest of a whole community. The prisoners' counsel promptly moved for his discharge, which was at once granted.

The addresses of counsel and the judge's charge took up all yesterday afternoon from 2 o'clock to 7.30. Mr. Taylor taking over three hours; Mr. Macdonald a little over an hour, and his lordship about an hour.

The court room was crowded all day. Few cases tried in Nelson have awakened such general interest. The court was adjourned from noon to 2 p.m., for the convenience of counsel, and from 8 to 9 in the evening to allow the jury much needed refreshment.

At 10.20 p.m. word was given that the jury had agreed. The officials of the court and the counsel took their places, the prisoner was conducted to the box, and his lordship entered soon after and sent for the jury.

There followed a moment of suspense as clerk Daly asked: "Have you agreed upon a verdict?" "We have," from foreman Ames. "Do you find the prisoner guilty or not guilty?"

"Not guilty." The foreman submitted a request from all the jurors that they be excused from further duty during the adjournment, which his lordship was unable to grant though sympathizing with the request.

The court was then adjourned to Monday morning at 11 o'clock. When sent shortly after his release from custody, John R. Roberts had little to say regarding his case. He expressed appreciation of the action of the jury and expressed himself as thankful to the members of it.

Roberts stated that he had no plans for the future and said he was unsettled as to what he would do. He expects to leave for Silverton at once but said he was undecided whether he would remain there or not.

When Roberts emerged from the court house he was greeted by many friends, and it was noted that among the number who hastened to shake his hand was Cleve the tailor who gave the strongest evidence against him.

Roberts spent the evening about the city receiving the congratulations of friends.

When the court opened yesterday morning jurymen not engaged in the Roberts' case were excused until 2 o'clock.

Roberts was again conducted to the witness box and W. A. Macdonald resumed the cross-examination. Roberts could not remember any fighting with Ryan the evening of January 16. He could not say at what time he went home that night. He remembers nothing about it.

Roberts did not know who were to be summoned on his behalf. He did not engage counsel until a little over a month ago. He had asked for a search warrant to find his rifle to assist his defence. The warrant was produced, it bore the date 31st January, and was made out by S. S. Taylor. He knew that his 44-0 rifle was out of his possession. The 44-0 rifle was in his possession as late as four or five days before the shooting. M. S. Davys' statements as to Roberts crossing the road, leaning over the fence, lighting his pipe and passing into the Victoria, the accused described as untrue and manufactured. He never, he said, had any trouble with M. S. Davys. He knew of no reason why Davys should suspect him of having fired the shot. In the bar-room he spoke to no one the night of the 17th. He went in intending to ask Thorburn to let him read The Daily News. He sat there only two minutes. He was on friendly terms with Koch. On one of the plans he then showed the jury the route he took. He had not used the trail that night. If King and Black found tracks leading to his cabin, they were not his (Roberts). When Black and King came to his cabin it was King who told Roberts the reason. King's statement that it was Black who spoke is untrue. During the interview, he did not mention his 44-0 rifle, or its having been loaned to Cleve. King's statement that cartridges were found at the head of the bed is untrue.

He was down town next day before his arrest. Thorburn said the shooting occurred at 3 minutes to 6. His denial of it is untrue. Roberts said he knew no reason why Thorburn, King, Davys, Cleve or Smith would wish him harm. He repeated his statement that Black dropped an empty cartridge near his (Roberts') cabin. He did not think that Black found cartridges near his cabin. He refused to say who, in his opinion, fired the shot. His lordship upheld the refusal. John Smith did not see him as he (Smith) described. Smith drinks and gambles, and is half crazy when drunk. Smith, Roberts said, went white when he faced him from the witness box.

Quite a few were at the preliminary hearing. Callard, Cleve and others were there. All Silverton knew that he was arrested on the charge. Any one who had fired by accident would have known of the charge. Eight people had told untruths against him at this trial.

S. S. Taylor, re-examining, asked Roberts about defects in his rifle. Roberts said his rifle went off very easily. He also said that he was wearing a black felt hat the evening of the 17th of January.

The accused wished to express his opinion of the evidence of W. N. Lenfesty, but was stopped by his lordship. To the jury he said he could not tell the date of the manufacture of his rifle. E. Rammelmeyer and H. H. Pitts testified to Roberts' good character and reputation through many years.

That closed the case for the defence. W. A. Macdonald declared his intention of rebutting several points in Roberts' own testimony. S. S. Taylor objected that what the crown wished to offer was really substantive evidence. The court sustained the objection. Mr. Macdonald then tendered Cleve to clear up disputed points. His lordship left the question to the jury, saying:

"It is your sworn duty to be absolutely impartial. Spare neither time nor anything else."

At the jury's request W. E. C. Koch was recalled. The foreman asked if he were sure he saw Roberts in the hotel. Koch said: "No." Daigle was then recalled. To the foreman of the jury, Daigle said: "I cannot swear whether he wore a hat or a cap. I didn't notice." M. S. Davys, recalled, swore that Roberts was wearing a cap.

The jury decided that Cleve need not be recalled. The matter was clear to the jury.

W. A. Macdonald then tendered J. T. Black in rebuttal of Roberts' evidence as to the empty shell. The court ruled against it.

The court then rose until 2 o'clock. His lordship remarked on re-opening that as the Roberts' case would probably take the remainder of the day, and as the next case, that of Pera, for perjury, would probably be long, requiring many witnesses and an interpreter, he thought it inadvisable to sit on Saturday. The first part of Monday morning would be devoted to chamber work. Petit jurymen not empanelled in the Roberts case were therefore excused until Monday morning at 11 o'clock.

S. S. Taylor then proceeded with his address to the jury on behalf of Roberts. His address was a very long one and comprised a most exhaustive review of all the evidence adduced both by the crown and for the defence. Briefly summarised his argument was that Roberts had not fired the shot; that the crown had failed to show the slightest incentive for Roberts to have attempted to shoot Davys and that much of the evidence that apparently told against his client was false and unworthy of credence, some of it, he claimed, had been manufactured and the witnesses had been guilty of deliberate perjury. He expatiated upon the honorable record of the accused and appealed to the jury to reject the supposition that a man of Roberts' stamp would deliberately attempt to murder a fellow-being for a reason so slight as had been charged.

W. A. Macdonald's address did not occupy much time. He said the evidence was so strong and clear that it was unnecessary for him to attempt to influence the jury in any way. He vigorously repudiated the insinuations of counsel for the defence that witnesses for the crown had given false testimony.

In summing up Mr. Justice Morrison reviewed the evidence at some length, his deductions conveying the impression that he entertained strong doubts as to the probable guilt of the prisoner.

CONTROL OF THE SULLIVAN

Now in the Hands of the American Smelting & Refining Company

Spokane, May 12.—Charles Sweeney, interviewed on his return from New York, said: "Since selling my stock in the Federal Mining & Smelting company to the American Smelting & Refining company, I am merely holding the office of president temporarily, and I hear that Fred Bradley, the head of the Bunker Hill and Sullivan, has been elected to succeed me."

The Federal company owns control of the Bunker Hill and Sullivan group of mines in the Sullivan Group Mining company, operating mines and a smelter near Marysville, B. C. Now through its ownership of control in the Federal, the American Smelting & Refining company becomes a dominant factor in the affairs of the Sullivan. I personally have no interest in the Sullivan.

"The American Smelting & Refining company is behind this new American Smelters' Securities company, which is acquiring control of the smelters on the Pacific coast."

NEUTRALITY QUESTION RELIEVED

Paris, May 12.—Dr. Motono, the Japanese minister, called at the foreign office this afternoon and had an extended interview with foreign minister Delcasse on a subject not disclosed, but assumed to be the neutrality question, which is generally considered to have been much, if not entirely, relieved by the departure of the Russian second Pacific squadron from the French waters.

DUNCAN ROSS MADE A HIT

His Presentation of Case
for V. V. & E. Earns Him
Warm Praise

Testing Plant for Reducing Magnetite Iron
Ore by Electro-Thermic Process to be
Installed at Ottawa

(Special to The Daily News)
Ottawa, May 12.—Duncan Ross is being congratulated on all sides for his able presentation to the railway committee yesterday of the Victoria, Vancouver & Eastern bill. No one even attempted to answer him. No one could. The unsigned document which no one would father and which was a violation of the rules of the house was all that could be said on the other side. Old members of parliament say they never saw or heard a better exposition before a committee.

C. N. Bell, secretary of the transportation commission, is now in the city on his way west. He was in Montreal seeing Reford, chairman of the commission, and made arrangements for further meetings. The commission will meet at Fort William and Port Arthur about the end of the month and will afterwards move to Winnipeg. Later on, sittings will be held on the Pacific coast.

Mrs. R. W. Scott, wife of the secretary of state, died at 5 o'clock this morning. She has been ill for some time past and her death was not unexpected, although deeply regretted. Mrs. Scott was the daughter of the late John Heron. Mrs. Scott was one of the several clever and highly accomplished sisters known in professional life as the "Heron sisters," who in the early fifties came to America from Dublin, Ireland. For a time they toured Canada in company with Sir William Henry Don, a baronet of Nova Scotia, whose title became extinct. Mrs. Scott on her marriage left the stage and has since resided in Ottawa. In the formation of the National Council of Women by the countess of Aberdeen. Mrs. Scott was placed on the executive and afterwards became president of the local council. No lady was held in higher esteem by all classes.

Mrs. Evariste Fletcher, wife of P. O. Inspector Fletcher, who lives in Victoria, is a daughter of the late Mrs. Scott.

Last year the government sent a commission to Europe, at the head of which was Dr. Haanel, superintendent of mines, to investigate the subject of the smelting of iron ores and the making of steel by the electro-thermic process. The commission made a very careful investigation, and the result was a remarkably able report, prepared by Dr. Haanel. This report is necessarily very technical, and enters into details of a highly scientific nature, and consequently is not a report that will be read by many. The demand for it, however, is very great from almost every country in the world where iron ores are lying undeveloped, while the scientific journals of the United States have been very generous in their praise of the work done by the commission.

In France where the electro-thermic process was investigated the ores treated were hematite; in fact the reduction of magnetic ores by this method is not as yet carried on anywhere. The iron ores of British Columbia and of Eastern Canada are, however, chiefly magnetite, and ever since the report was issued, there have been many inquiries made of the government regarding the feasibility of smelting magnetite by the electro-thermic process.

While Dr. Haanel claims that there is no doubt whatever that magnetite can be smelted by this process as successfully as hematite still investors are naturally timid in adopting a new process and investing large sums in developing water power and erecting electric smelting plants for the manufacture of pig iron from magnetite, unless it can be experimentally shown that such a process is both practical and economic under conditions prevailing in Canada.

To awaken confidence in capitalists and enable a new industry to be established by the adoption of the electro-thermic process of smelting, it is therefore necessary to demonstrate that the process is applicable to the various grades of Canadian ores, and also whether iron ores containing considerable percentages of sulphur and phosphorus, which up to now have been considered valueless, cannot be successfully treated by the higher temperature available in an electric furnace. It is this problem that the government is now undertaking to solve for the benefit of the iron mining and smelting industry of Canada. Its successful solution will mean the addition of millions—yes of hundreds of millions—to the industrial wealth of the country, and will add enormously to the population and to the importance of Canada as a manufacturing country, for the cheap production of iron and steel is the basis of the manufacturing pre-eminence of Britain, and undoubtedly one of the direct causes of the stupendous growth of manufacturing in the United States.

British Columbia is, in her natural wealth, the most highly favored province in the dominion. It possesses an abundance of coal, without which up to the present time iron ore deposits in eastern Canada, no matter how rich and abundant, have been of no value. But if Ontario and Quebec have no coal they have abundant and widely distributed water powers. Magnetite ores are found in many places, and in close proximity to waterfalls. Dr. Haanel proposes to demonstrate that these waterfalls can be utilized to generate electrical heat, in substitution for the heat produced from coal, and that the magnetic rocks adjacent can be transmuted into pig iron, better and cheaper than can be done by the blast furnace now everywhere in use. It is a question of water power against coal, and as all central Canada is without coal, but is rich in water power and magnetic ores, the enormous importance of the project will at once be apparent.

Once pig iron is produced economically by the electric process, the enlargement of the plants put up by private enterprise for the manufacture of structural steel and all other classes of steel by the electric process will follow as a natural development, and Canada will no longer be under the necessity of importing its iron, the raw material of all industrial progress. The amount of iron and manufactures of iron imported into Canada in 1903-4 was in value over \$43,000,000. Complete success of the electro-thermic process will mean the retention of that vast sum in Canada, but the demand for iron and steel is growing, and with the marvelous expansion now going on—increased population, building of railways, the multiplication of industries and the substitution of steel for wood in modern architecture—the time is not far distant when the added home-productions, if the process is made a success commercially in Canada, will be increased as has been already stated, by hundreds of millions annually.

As an initial step towards the accomplishment of these results, action is now being taken. There is no doubt in Dr. Haanel's mind that magnetite iron ores can be smelted by the electric process, although it has yet to be demonstrated in such a practical way that capital will be enlisted in the enterprise. There is still some experimentation to be carried on, and the government is going to undertake that most important educational work.

An experimental plant will be erected in Ottawa, and will be conducted under the personal supervision of the superintendent of mines. It is proposed to build a two-story furnace, using 300 electric horsepower, of the description successfully used in La Praz, France. Dr. Herout, one of the original investigators in this branch of metallurgy, who is now in this country, will superintend the installation of the plant, and make the necessary experiments. The information thus obtained will be given to the public in due time, and in this way private investigators will be saved heavy expenditures in attempting to solve the great problem of the economical smelting of iron ores without the use of coal. In British Columbia, where there are vast deposits of magnetite and water powers running to waste, the experimental work will be watched with interest, as indeed it will be all over Canada.

In the course of debate on the provisions of the Alberta autonomy bill, premier Laurier suggested that when the conference is held upon Manitoba's claim for increased territory "it would be, perhaps, good policy if we should ask all those provinces to take over the administration of all unorganized lands to the north, as far as they extend in British territory."

R. L. Borden—that would be very satisfactory.

W. F. MacLean—What would become of the Yukon?

Sir Wilfrid Laurier—that would become part of British Columbia.

RUINED BY
THE STORM

Three Hundred Families
of Snyder Rendered
Destitute

Local Relief Committee Issues Appeal for
Aid to the American People—Need is
Urgent for Food and Money

Snyder, May 12.—All reports of the number of killed by Wednesday night's tornado in Snyder and its vicinity, make the total at least 125 persons. The tornado travelled 35 miles, cutting a path from a quarter of a mile to a half a mile wide. The farm houses in its path were demolished and the occupants killed or injured. Estimates of the number killed outside of Snyder range from 25 to 40. More than a hundred laborers brought by the St. Louis & San Francisco Railroad company, together with a big force of volunteers, began moving the burning debris today. Two men dead and a man barely alive were found in a heap of rubbish piled against freight cars. They had been there since Wednesday night at 8.15 o'clock, at which time every clock in town stopped.

About 400 persons were injured, most of them suffering only slight bruises. Forty-five persons are receiving hospital treatment on account of lack of accommodations, the severely wounded are being taken to larger towns. The relief committee is thoroughly organized and working. The hospital arrangements are somewhat incomplete.

The following appeal for aid has been issued by the local relief committee:

"To the people of the United States: This place was almost totally obliterated by a cyclone on the evening of May 10th, the people here are dividing their all but have not enough to relieve the pressing necessities. Neighboring towns are generously supplying us with hospital supplies and food. Fully three hundred families have been ruined by the storm, 1500 people are more or less dependent on the good will of the generously inclined, to tide over the present distress. Money is urgently needed. Property loss including crops, stock, homes and other property will reach over a half a million dollars, with a portion of the stricken district yet to be heard from. The stricken people have helped the less fortunate to the extent of \$500 in cash besides dividing food, provisions and clothing with those who lost their all. In view of these circumstances we ask assistance from the American people."

SHUFFLE IN PORTFOLIOS

Montreal Politicians Speculate on Coming Cabinet Changes.

Montreal, May 12.—There is considerable speculation in political circles as to the coming cabinet shuffle at Ottawa. Owing to Mr. Sutherland's death there will no doubt be a re-arrangement. According to gossip in political circles here, Hon. R. W. Scott, the secretary of state, will withdraw, and be succeeded by Hon. R. Lemieux, the solicitor-general. Hon. Charles Fitzpatrick, the minister of justice, will shortly be appointed to the bench, and this portfolio will be filled by A. B. Aylesworth, K. C., of Toronto.

It is well known that the Hon. Raymond Prefontaine is anxious to become minister of public works, which portfolio he will now, it is expected, receive. The office of minister of marine and fisheries will then be handed over to Hon. C. F. Hyman, minister without portfolio, the latter gentleman to be succeeded by Robert Bickerdike, M. P., as minister without portfolio.

QUEBEC'S DANGEROUS CLIFF

Great Retaining Wall May Be Built Along the Base.

Quebec, May 12.—Colonel Macdonald, quartermaster-general, and lieutenant-colonel Weatherbe, director of engineers, have inspected the cliff and the end of the Terrace, which is in a dangerous condition, regarding work to prevent a landslide. While nothing definite is decided upon as yet, as to what form the work of strengthening the cliff will take, it is understood that one idea is to construct an immense retaining wall along Champlain street, at the base of the cliff. If something of the above nature is not resorted to it is likely the dangerous part will be removed, and the remainder strengthened, else it may soon crumble off of its own accord. It is hoped, however, that the cliff may be preserved.

KASLO ORE SHIPMENTS

The shipments of ore through Kaslo from April 27th to May 11 were 795 tons. The Whitewater was added to the list of zinc shippers, two cars of ore coming to the Kaslo sampler. There are now eight mines in the district producing zinc: the Lucky Jim, Sloan Star, Ivanhoe, Last Chance, American Boy, Wellington, Whitewater and Bell. The shipments were: Lucky Jim, crude zinc ore to Kootenay Ore Co., 592 tons; M. J. Halpin, Whitewater

mine zinc to Kootenay Ore Co., 40; Wellington, zinc to Pueblo, 33; Last Chance to Kootenay Ore Co., 20; Payne to Nelson, 21; Halpin and Hawes, (Whitewater) to Nelson, 68 1-2; Clements and Wright, (Whitewater) to Nelson, 20 1-2. Total 795 tons.

SETTLEMENT OF THE WEST.
Regina, N.W.T., May 12.—Predictions that this year's immigration would greatly exceed all former years are being rapidly verified these days, and although all branches of industry are busy in Regina, there is no place that can compare in that respect with the dominion lands office. A large staff of officials and clerks is kept constantly busy and overtime work is a necessity.

Homestead entries for the past month totalled 1,111, which means that no less than 177,760 acres of land were taken up by actual settlers in the Regina lands registration district.

In April of last year entries only numbered 573.

TO BUY REID RAILWAYS

Sydney, N. S., May 12.—It is reported here that H. M. Whitney, of Boston, and former president of the Dominion Coal Company, is heading a syndicate of American capitalists with the view of purchasing the Reid Newfoundland railway and all the franchises owned by the Reids in Newfoundland. Mr. Whitney is now president of the Timber Estates Company, which owns extensive timber areas in that colony.

RELIGIOUS ORDERS IN ENGLAND.

London, May 12.—Convents and monasteries are multiplying so rapidly in this country, through the expulsion of the religious orders from France that T. L. Corbett, M. P., has drafted a resolution calling on the government to institute a strict inquiry into their numbers and management.

In 1836 there were only sixteen convents in Protestant England; there are now 1,452 convents and monasteries, as compared with 592 in Ireland. It is alleged that the various industries carried on in them are not inspected by Government, and that deaths and burials within their walls are never notified to the authorities.

BANK OF MONTREAL PROFITS

Montreal, May 12.—The statement of the result of the business of the Bank of Montreal for the half year ending April 30th shows profits of \$781,960.40.

BIG RUSH IS EXPECTED

CORA MINE EXPLOSION

Seven Men Meet Instant
Death--Bodies of Three
Blown to Pieces

Believed Miner Carrying Sticks of Dynamite Accidentally Ignited Them With His Lighted Lamp

Butte, Mont., May 12.—Seven men were killed and one injured, probably fatally, by an explosion in the Cora mine, one of the Heinze properties today.

The cause of the explosion is not known. Nels Wampa was carrying 40 sticks of dynamite up a ladder to join his companions on the 1400 foot level when the accident occurred. It is believed that he accidentally touched his lighted lamp to the explosives.

Wampa was blown to bits, fragments of his body being found several hundred feet away.

Two men working nearby were also blown to pieces, the remains when picked up filling seven sacks.

Four others 100 feet distant were instantly killed, but their bodies were not mutilated.

While foreman Thomas was groping in the smoke to rescue the men, he found half of the top of Wampa's head hanging to an electric light over a hundred feet from the scene of the explosion.

JAPANESE TRANSPORT WRECKED

Struck a Mine and Entire After Part of Vessel Blown Away.

Chefoo, May 12.—(8 a.m.)—A merchant vessel, which has just arrived, lends confirmation to the report that the Japanese transport Sheyutsu, with 1800 tons of provisions, bound for New Chwang, struck a mine on the 4th of May, near the Miao Island. The entire after part of the transport was blown away. The Sheyutsu signalled the merchantman that she was in distress, but refused aid when she ascertained that the merchantman was a Chinese ship. The captain of the merchantman says that it seems impossible that the transport could live in the storm that was prevailing at the time and he believes it sank.

MARTIAL LAW IN FORMOSA.

Tokio, May 13.—An imperial proclamation declaring that martial law exists throughout Formosa and declaring that country in a state of siege, was gazetted today. The proclamation became effective today.

DIRECT TAXATION.

The New York Nation strongly condemns the system of indirect taxation and as the question of taxation, direct and indirect, has been prominently before the taxpayers of this province the Nation's indictment of the one system may provide food for thought for others than the New York readers of that paper.

The Nation starts out by saying that the fear of taxes is getting to be common in the United States. The old ones are not adequate; new ones are almost impossible to find. Yet a kind of blank despair settles down upon the authorities when it is proposed to revert to the sure and simple expedient of a direct tax. Happy-thought legislators suppose they have solved the whole problem by incorporation taxes or franchise taxes or mortgage taxes or strong-transfer taxes. A few, they imagine, will have to pay, and the other lucky dogs will escape. But as well

think to exert pressure upon one portion of water in a pail without disturbing the rest. A tax, even when apparently most indirect, is one of those 'good things' which every man displays most unselfish eagerness to 'pass on' to his neighbor. That there is great popular misapprehension about this shifting of taxation is no reason why those who levy taxes should shut their eyes to the facts. Bucllic ignorance, even blissful, ought to be rudely disturbed. The farmer should have it made plain to him that a tax on mortgages, such as his innocent soul rejoices in because he thinks it is a good way to draw the fangs of money-lenders, really reflects itself in a higher rate of interest which he has to pay on every loan. But the political viciousness of indirect taxes is even more glaring than their economic. They are a direct temptation to extravagance. They cover up the truth, and lead credulous citizens to suppose that the treasury is filled by a species of magic, instead of by draining their own pockets, and hence that wasteful schemes of public expenditure do not much matter, since nobody, except the hated corporations, has to foot the bill. What an indirect system of tariff taxation has done to debauch the political integrity of the United States (quite apart from the outright corruption to which protectionists have resorted) is

incalculable. . . The tax-gatherer is the chief of political schoolmasters. Others intimate or allege waste in carrying on government; he demonstrates it by figures which cannot lie. All the more desirable is it, therefore, that he be allowed to go as straight as possible to every citizen with his whole-some lessons. He is the great reinforcement of the axioms of political morality. It is easy for theorists to assert, or deny, that war and preparations for it are a crushing economic burden; but there is no refuting the eloquence of the tax bills. They are the great check upon lavish government; they make presidents and governors and congresses and legislatures think twice before embarking upon grandiose projects. Hence it is of the highest importance, in the public interest, that every man be made to know precisely how much his rulers are taking from his earnings to support the government. In this light, direct taxes are to be welcomed rather than dreaded. They tend to bring about that clear understanding of the situation which Voltaire expressed by writing that every time an individual applied for a pension or a government grant of any kind, he really demanded so much money out of the pockets of his neighbors.

THE FIRE DEPARTMENT

What may be accepted as a semi-official explanation of the mayor's actions in regard to recent changes at the fire hall has been published. From this statement it appears that former chief Steele was "incompetent and the men under him could not be efficient." Consequently steps were taken to replace him, but before his successor arrived he resigned as chief "after causing as much trouble as he could." Of subsequent dismissals the statement says generally, "In the department there were a half dozen most active partisans of Neelands and Steele. None of them are in the department today, and none of them will be in the department again as long as John Houston is mayor of Nelson. During the remainder of this year at least, the department will not be made up of inefficient sore-heads and scabs. Instead, it will be made up of efficient and capable men,

who have enough sense to keep their mouths shut, even at a fire." These remarks refer, presumably, to Samuel Coulter, D. Herb, R. Elliot and J. E. Procter, and if these men have proved to be "inefficient sore-heads and scabs" they certainly should not have been retained in the fire department a moment longer than was absolutely necessary. Less friction would have occurred in connection with fire department matters had the grounds for the dismissal of these men been stated by the mayor at a council meeting. However, the reasons for their dismissal are now public and if concurred in by a majority of the mayor's colleagues, must be accepted as final.

With regard to the proposed plan of re-organization of the fire department, the statement says:

"The re-organization of the fire department, as recommended in the message of mayor Houston to the council, had the full approval of aldermen Malone, Kirkpatrick, Annable, and Macdonald on Monday, April 24th; it was on lines approved of by the board of fire underwriters, and had it been adopted by the council would have resulted in a reduction of insurance rates; it also, would have given the firemen a chance to be off duty at regular times, like other civic employees, without endangering the property interests for the protection of which the fire department is organized."

Whilst there is still lacking explanation of the details of the plan, enough is divulged to indicate that the proposition merited more consideration than it received. If, as suggested, the new plan would have resulted in increased efficiency and reduced insurance rates, the matter should be reconsidered. Insurance rates are very high in Nelson and any reduction therein would be a distinct benefit to many business men and property owners.

An experiment in total prohibition made by the magistrates of Glasgow has had very unexpected and unpleasant results. Under the new Scottish Licensing Act they are empowered to choose three days in the year for the total closing of public houses. Easter Monday was accordingly chosen as one of the prohibition days, and was the

first on which the new system has had a trial. Within the bounds of the city no liquor was procurable, and there was a stampede of thousands by rail and tramway to neighboring places where drink was on sale. Paisley, which is seven miles from Glasgow, was besieged. A number of the public houses had sold out by the middle of the day, and others were so crowded that the proprietors had to close after a hopeless attempt to regulate the rush. A number of extra constables were called out to assist in keeping order.

GALENA AT HOWE SOUND

Important Location Made by Prospector Archibald-Big Ledge Uncovered. After a year of patient toil and searching, conducted with no small degree of secrecy, Hugh Archibald has located a veritable Slocan almost at the door of this city, says the Vancouver World. On Howe sound, only a few miles from Vancouver, Mr. Archibald has located a deposit of galena that is equalled nowhere in the province outside of the famous Slocan mines. It is the first discovery of the kind on the coast and its richness is enhanced beyond the deposits of the Slocan by its location on deep salt water. An assay of the ore gives \$40.33 in gold, copper, silver and lead. The ore is distinctly a silver-lead ore, but the copper value is fairly high. When it is remarked that this assay was from surface ore and not a picked sample at that, some idea of the possibilities of the new find may be formed. Furthermore the ledge which is hidden by a capping of schistose rock, has been uncovered to a width of ten feet in practically solid ore, and the formation indicates a possible width of 50 feet when the stripping is finished. Locater Archibald is not a tenderfoot profiting by bullheaded luck but a veteran prospector, who has just reaped the reward of more than a year's scientific search for this ledge. Over a year ago he became convinced that the ore was there but as there was capping over it, coupled with other difficulties that all prospectors appreciate, it took him until a few days ago to find the ore.

THAT IMPUDENT YOUNG COUPLE

Theatre goes on Tuesday evening next will have the pleasure of welcoming to Nelson Russell Reid and Miss Juliette Chandler in a very popular comedy entitled "That Impudent Young Couple." According to the Ottawa, Montreal, Toronto and Winnipeg papers, which are unanimous in their praises of the production and the capable and proficient manner in which the star parts are handled by Mr. Reid and Miss Chandler, an enjoyable performance is assured of an exceedingly clever and amusing comedy.

WEEKLY BANK CLEARINGS

Montreal, May 12—The following are the weekly bank clearings as compiled by Bra's report for the week ending May 11, showing percentage of increase and decrease as compared with the corresponding week last year.

London.....	1,062,343	3.2
Victoria.....	807,917	41.8

TO INVESTIGATE TRAGEDY

Dr. Arthur and Constable Black to Enquire into Three Forks' Affair. Chief of provincial police W. H. Bullock-Webster received official notification yesterday of the finding of the dead bodies of the Kelling brothers near Three Forks on Thursday. The information came from the gold commissioner of the district and merely stated the fact of the discovery with the comment that the tragedy had the appearance of a case of murder and suicide. The cabin in which the bodies were found was locked up and two guards stationed to watch it pending the arrival of the authorities. As there is no coroner in the district Dr. E. C. Arthur has been authorized to go to Three Forks and hold an inquest and chief Bullock-Webster has ordered constable Black to accompany Dr. Arthur and make an investigation. Dr. Arthur and constable Black will leave for Three Forks this morning.

COLLAPSE OF GAS HOLDER

Explosion Followed Killing Two and Injuring Two Score More Men. Philadelphia, May 12—Two men were killed and nearly all of them were injured by the collapse of an immense gas holder at the Point Breeze works of the United Gas Light and Coke company. In the southern part of the city. The dead men are Geo. H. Whalen, a tin roofer, and James Ogilvie, his assistant. Bradley, an employee of the Gas company, was fatally injured. The gas holder collapsed from some unknown cause and the great volume of gas which the holder contained exploded with such force that the building within a radius of half a mile were shaken. When the holder collapsed Whalen and Bradley were at work on a small building near by. It is believed that when the gas escaped from the holder it was ignited by the tinner's furnace, causing a great flame. There were more than 50 men a short distance from the tank, and nearly all of them were either burned or scorched before they could escape from the flames. Whalen and Ogilvie were so badly burned that they died in a few minutes. A general call for assistance was sent out and all the injured were conveyed to the hospitals. About a dozen are still in the hospitals under treatment for their burns.

PRIZES FOR SCHOOLS

Teachers and Pupils Will Have a Chance at Dominion Fair. New Westminster, May 12—A British Columbia school exhibit is to be made one of the features of the dominion fair. The educational advantages enjoyed by residents of this province, with various samples of results, will be shown to people from other parts of the world. In order that the display may be as large as possible it is necessary that teachers and pupils begin at once to prepare exhibits. Handsome prizes will be offered for collective displays and for individual work. These will include products of manual training, kindergarten, brush work, penmanship, drawing, composition, etc. The minister of education who is deeply interested in the proposed exhibit has been asked to permit the superintendent of education to take charge of it.

SMEILER AT FAIR

New Westminster, May 12—One of the latest attractions secured for the dominion exhibition to be held here from September 27 to October 28, is an exhibit of the Smelter at Fair. The exhibit will be illustrative of mining and smelting operations, arrangements for which have been made with the Hall Mining & Smelting company of Nelson.

EARL GREY SIGHT SEEING

Montreal, May 12—The governor general and general manager McNeill of the C.P.R., and W. R. Baker, the latter's assistant, as escorts, spent the morning at the new Angu car shops of the Canadian Pacific railway. His excellency was shown the process of manufacturing locomotives and cars from start to finish and was greatly interested. His excellency left for West Point, N.Y. tonight to inspect the United States military academy there.

If a man's wife is a good baker, nothing

but the best flour is good enough for her. There can be no greater extravagance than the use of inferior flour.

Winchester Springs, Feb. 27th, 05.

"I read about Royal Household Flour which is purified by electricity. I also read about the woman paying freight 25 miles before she would be without it. Royal Household was not sold in our town, I was asking about it and my grocer told me to wait a day or two and he would get some, and I am glad I did so. My wife is a good baker and made good bread out of other flours, but what she has now made out of Royal Household is so far ahead that I would be willing to pay freight fifty miles instead of twenty-five, rather than go without it. There is no flour 'just as good' as Royal Household."

(Signed) JOHN HENDERSON.

Now, is there a single woman in the whole country who, after reading what Mr. Henderson says, will not at once send for the Royal Household recipes and give Royal Household Flour a trial. Mention this paper and address

TO ESTABLISH NEW ZION

SCHEME TO FOUND JEWISH STATE
IN EAST AFRICA.

MANY JEWISH INSTITUTIONS ARE
OPPOSED TO IDEA.

London, May 12.—The commission sent out by the Zionists to explore the strip of territory in East Africa, offered by the British government, has returned to England, and the Jews of America will be interested in learning the progress of the great movement in which they are as keenly interested as their brethren in Great Britain and other parts of Europe. Although the full report of the commission will not be made known until it is placed before the delegates at the forthcoming Zionist congress, it is learned on excellent authority that it will be favorable to the acceptance of the land by the Zionists. The report, however, says that another expedition will have to be sent to subdue the natives in the surrounding districts.

Part of the report is already in the hands of the executive of the Great Actions committee in Vienna, the contents of which have placed the committee in a more difficult position than they were in before the commission was sent. At the last congress the more mention of the fact that a piece of land was offered to the Zionists caused a split, as the delegates would have nothing but Palestine, and many seceded from the movement in consequence of a vote being carried to send an expedition to investigate the suitability of the same. Now a vote will be taken at the forthcoming Congress to accept the offer, and in the probability that it will be carried, this will cause a further split. The Great Actions committee, realizing the difficulties of the situation, have decided upon a diplomatic move, which will not only prevent a further split, but may cement the different factions.

So as not to offend the British government and to satisfy the opponents of the scheme, the committee has decided to divorce the East African scheme from the Zionist program, and invite the co-operation of all other Jewish institutions to discuss the report of the commission, with a view to deciding upon a definite answer to the British government.

The object of the Zionists in accepting the offer of land is to establish a temporary Jewish state with local autonomy, but many Jewish institutions are opposed to this idea. Without the financial assistance of other Jewish institutions the Zionists feel they will be unable to accept the offer, as they have no money available for that purpose, and the scheme must eventually fall through, after spending about \$10,000 on the expedition. The financial inability to place 30,000 Jews on the land offered was very well known by many leading Zionists, who therefore voted against a commission being sent and wasting valuable time and money. All this will again come up at the Zionist congress to be held in Switzerland shortly.

WHY SUFFER FROM RHEUMATISM
Why suffer from rheumatism when one application of Chamberlain's Pain Balm will relieve the pain? The quick relief which this liniment affords makes rest and sleep possible, and that alone is worth many times its cost. Many who have used it hoping only for a short relief from suffering have been happily surprised to find that after awhile the relief became permanent. Mrs. V. H. Leggett of Yum Yum, Tennessee, writes: "I am a great sufferer from rheumatism, and I have found Chamberlain's Pain Balm is the only thing that will relieve the pain." For sale by all druggists and dealers.

If you have not bought a cake of Simpson's chemical eraser soap you have not made the best investment offered. It costs by 25 cents and is the most useful article on the market for taking stains of any kind from clothing, lace, linen goods, etc. It takes the grease out of coat collars. You can get it at the Canada Drug & Book company's stores, Nelson, B. C.

S. H. Seaney who has taken over J. A. McDonald's retail fruit and candy business, announces the opening of the Soda Water season. The fountain is now charged and ready for business.

ANOTHER WONDER OF SCIENCE.

Biology has Proved that Dandruff is
Caused by a Germ.

Science is doing wonders these days in medicine as well as in mechanics. Since Adam lived, the human race has been troubled with dandruff, for which no hair preparation has heretofore proved a successful cure until Newbro's Herpicide was put on the market. It is a scientific preparation that kills the germ that makes dandruff or scurf by digging into the scalp to get at the root of the hair, where it saps the vitality, causing itching scalp, falling hair, and finally baldness. Without dandruff hair must grow luxuriantly. It is the only destroyer of dandruff. Sold by leading druggists. Send 10c. In stamps for sample to The Herpicide Co., Detroit, Mich.

Mothers Are Helped THEIR HEALTH RESTORED

Happiness of Thousands of Homes Due
to Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's Advice.

A devoted mother seems to listen to every call of duty excepting the supreme one that tells her to guard her health, and before she realizes it some derangement of the female organs has manifested itself, and nervousness and irritability take the place of happiness and amiability.

Mrs. Anna McKay

Tired, nervous and irritable, the mother is unfit to care for her children, and her condition ruins the child's disposition and reacts upon herself.

The mother should not be blamed, as she no doubt is suffering with backache, headache, bearing-down pains or displacement, making life a burden.

Lydia E. Pinkham's Vegetable Compound is the unfailing cure for this condition. It strengthens the female organs and permanently cures all disorders such as this letter describes:

Dear Mrs. Pinkham: "Being mother of five children, I have had experience with the general troubles of my sex. I was lacerated when one of my children was born, and from that hour I date all of my afflictions. I found that within a few months my health was impaired, I had female weakness and serious inflammation and frequent flowing spells. I became weak and dizzy, but kept on my feet, dragging through my work without life or pleasure. A neighbor who had been helped by taking Lydia E. Pinkham's Vegetable Compound insisted that I take at least one bottle. I did so, and felt so much better that I kept on the treatment, and it made me a strong and well woman. The few dollars I spent for the medicine cannot begin to pay what it was worth to me."—Mrs. Anna McKay, 326 Spadina Ave., Toronto, Ont.

Mrs. Pinkham advises sick women free. Address, Lynn, Mass.

SYNOPSIS OF REGULATIONS FOR DISPOSAL OF MINERAL DOMINION LANDS IN MANITOBA, THE NORTHWEST TERRITORIES AND THE YUKON TERRITORY.

Coal—Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$1.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.

At least \$100 must be expended on the claim each year or upon to the mining recorder in lieu thereof. When \$500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to the claims containing iron and mica, also copper in the Yukon Territory, of an area not exceeding 100 acres.

The patent for a mining location shall provide for the payment of a Royalty of 1/4 per cent of the sales of the products of the location.

Placer Mining—Manitoba and the N.W.T. excepting the Yukon Territory—Placer mining claims generally are 100 feet square, entry fee, \$5; renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N.W.T., excepting the Yukon Territory—A free miner may obtain only two leases of five acres each for a term of twenty years renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or may receive entries for bar diggings or river claims except on the Saskatchewan River where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental \$10 per annum for each lease, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1000 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a Mining Recorder's office. One extra day is allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate. The discoverer of a new mine is entitled to a claim 1000 feet in length, and if the party consists of two, 1500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee \$10. Royalty at the rate of two and a half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fees of \$2.00 each, and the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery or the land to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth of the claim, and the discoverer of oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 500 acres, shall be well sold.

It shall be sold to the prospector at the rate of \$1 an acre, and the remainder of the tract reserved, namely 1380 acres, will be sold at the rate of \$3 per acre, subject to royalty at such rate as may be specified by Order in Council.

W. CORY, Deputy of the Minister of the Interior.

Dated Interior, June 20, 1904.

ISLAND IRON INDUSTRY

BLAST FURNACE MAY BE ERECTED NEAR VICTORIA

QUATSINO HEMATITE CLAIMS ARE BONDED FOR \$75,000

In a telegraphic news despatch from Seattle the information is given that the purchase has been consummated by J. A. Moore and William Piggott of 22 claims of hematite ore on Quatsino Island, says the Victoria Colonist, and that the new owners of the extensive property, embracing over 100 acres, will embark upon the development of their holdings during the present summer. If the ore is found in sufficient quantity to justify the investment—it is already determined that its quality is eminently satisfactory—a blast furnace will be built at once, and pig iron be manufactured on a wholesale scale. The price paid for the property is stated by the Seattle correspondent to be in the neighborhood of \$75,000.

The fact that the William Piggott mentioned in the despatch, quoted as one of the purchasers, is an iron manufacturer of wide experience, the head of the company whose big rolling mills at West Seattle were inaugurated with due ceremony on Saturday last, is a most significant feature of the gratifying news. Everyone has been casually aware that there are large deposits of iron ore through out almost the entire area of Vancouver Island. Magnetic iron is found in quantity at Jordan river and at intervals all along the western seaboard. Hematite of the finest quality has been located near Chemainus, although not in sufficient quantity to warrant the large works essential to successful exploitation. At Quatsino, where bog iron and limestone are found in conjunction in large bodies, it is now believed by intelligent prospectors that hematite is existent in such quantities as to keep the largest blast furnaces employed for countless years, and to excellent profit.

What this means in the scheme of the industrial expansion of Vancouver Island only the most sanguine can approximate. Mr. C. H. Lugin, who has been very prominently identified with the exploitation of the industrial wealth of the Quatsino sound country, has just returned from Seattle, and frankly admits that it was he who has been interested in putting through the deal which is made the subject of the telegram quoted in the introductory paragraph of this reference. The properties referred to by Mr. Lugin are those generally known as the Iron Mountain group, situated on the west arm of Quatsino sound. As to the purchasers and price the Victoria barrister refuses to add anything to the statements of the Seattle correspondent.

The impression has prevailed that the ore mined at Quatsino sound is destined to be worked in Seattle or some other point on American territory. This, Mr. Lugin announces, is entirely incorrect. Negotiations are even now in progress with prominent Canadian capitalists for the erection of an extensive blast furnace on the island, where the conditions are, in the opinion of the experts, eminently satisfactory to the successful manufacture of pig iron on a profitable basis.

The question of location has not yet been considered in detail, but preliminary negotiations with large capitalists are well under way and promise successful fruition.

If the plant as contemplated is established on the island, Mr. Lugin asserts that it will be on a scale commensurate with the magnitude of the natural resources, which are illimitable. The works will involve an investment of fully one million dollars, and their prosecution will give continuous employment to several hundred workmen at good wages.

The claims embraced in the Iron Mountain group, and heretofore owned and controlled by a small syndicate of five or six Victorians, were discovered a year or so ago by T. J. H. Hickey and C. W. Frank. Lime, coal and iron are found in convenient conjunction, and the sailing facilities by water could scarcely be improved upon. Rarely, indeed, are the essentials so conveniently placed for economical assembling as in the northern corner of the island, where nature has apparently laid the foundation for an industry of large proportions, and of inestimable value to the development of the natural resources of this portion of British Columbia.

The Colonist also tells of the prospective development of the Texada Island iron deposits.

Mr. W. H. Lee, superintendent of the Puget Sound Iron company, was in Victoria on his way to Texada Island where he goes in connection with the big deal which has just been consummated by the Puget Sound company with a wealthy syndicate who are to reopen these valuable mines on a large scale. It is probable that Texada Island will now see a revival of the mining industry in a very short time. It is understood that the company who own extensive deposits on the southwestern portion of the island, have leased the property to a company with ample capital to be worked on a royalty basis. The mines owned by the Puget Sound Iron company cover most of the southeastern slope of Texada Island, some four miles off Gillies bay. For several years the mines were under lease of the Pacific Steel company who owned the Irondale smelter and worked the deposits on a basis of 40 cents per ton of 50 per cent iron, the ore being a magnetite. However, since the Irondale smelter closed down about a year ago, shipments ceased and the mines have since been idle. There has been a good deal of development work done, the main workings being large quarries in the face of a bluff 600 feet above the sea level, a surface gravity tram being used to get the ore to salt water, a quarter of a mile away. A good deal of the work will necessarily have to be done to put things in shape again. The prospects of renewed activity on Texada Island means a great deal for that island and the district will generally benefit thereby.

Geo. L. Chubb, a merchant of Harlan, Mich. There is no question about its being the best, as it will cure a cold or cough in less time than any other treatment. It should always be kept in the house ready for instant use, for a cold can be cured in much less time when promptly treated. For sale by all druggists and dealers.

Brush Bristles
"Ayo there's the rub." On the quality of the bristles depends the worth of the brush. BOECKH BRUSHES contain only perfect elastic bristles, specially selected under expert supervision. All loose bristles removed by special machinery, leaving a flexible smooth-working brush.

NOTICE

TENDERS
Will be received by the undersigned, up till the 10th day of May, 1905, at noon, for the sinking of a main hoisting shaft to a depth of three hundred (300) feet, more or less, at Lundbrook Mines, located at Lundbrook, Alberta. Plans and specifications may be seen either at the office of the Lundbrook & Land Coal Co., Ltd., at Lundbrook, Alberta, or at the office of the Crow's Nest Lumber Co., Ltd., at Wardner, B. C. or copies of the same will be mailed to the address of those wishing to tender on this work, on payment by them of the sum of ten dollars (\$10), the same to be refunded by the company on receipt of bona fide tender.

The lowest or any tender not necessarily accepted.

PETER LUND, Secretary.

NOTICE TO LOCAL MERCHANTS
Complaints having reached us of the manner in which the merchants of this city treat the interests of the workmen of this city; and whereas the said merchants go out of their way to thwart the best interests of organized labor: Take notice and govern yourselves accordingly that unless you, the said merchants, refrain from such interference, the Trades and Labor Council and all unions affiliated with them intend to take sharp and decisive action which will not be to the advantage of the merchants of Nelson.

MONEY MADE IN MINING

INVESTIGATE BEFORE INVESTING
AND NOT AFTER.

MINING INVESTMENTS GROWING
IN POPULARITY.

(From The Omaha Commercial)
The average man will tell you off-hand that an investment in a mining stock is money thrown away. The average man knows little or nothing about the value of any security in the stock or bond class.

The average man buys stocks or bonds on a basis of sentiment and without any actual knowledge of the actual value of the security.

Hundreds of what were considered to be astute financiers were ruined by the crash in "Steel" and "Ship Company" stocks. Their purchase of those stocks was not based on knowledge of the actual worth of the stocks, but was a matter of sentiment. They knew of, or thought they knew of, other people of wealth who were investigating and investing in "Steel" and "Ship Company," and they followed the crowd of "influential" people.

Analyze a general list of what are considered to be "sound investments," and give a logical reason for the fact that some of such securities will net the investor twice as much as other securities on the list. No logical reason can be given. Taken from the standpoint of past earnings, prospective earnings, actual assets, no reason can be found for the discrepancy in the selling price of many stocks. Sentiment alone seems to account for this condition.

The average industrial corporation is financed along these lines of "capitalizing its earning powers." As long as the business of such a corporation remains good and it makes money and pays dividends, the stock is counted "good," regardless of any intrinsic value it may have in the way of "property." In fact little attention is given to what the company owns and all attention to what it earns at the time the stock is bought.

Unfortunately, the average investment in a mining company is made in the spirit of "taking a flyer" with the idea of getting large returns for a small investment. This very spirit is taken advantage of by the large number of "mining sharks," who are willing to hold out the chance to the unwary of "getting rich quick" by taking a "little flyer." This method of investing (?) is in the nature of a gamble, and in a gambling game the dealer takes care that the player does not win.

The very fact that large fortunes have been made from a very small investment in the mining business, is an actual detriment to the mining busi-

it will require to make the mine a paying one. How much work has been done, how much stock has been placed in the treasury of the company, how much of the stock was paid for the property, or retained by the promoters. Ascertain the character of the officers and managers of the company and if possible learn what amount of money they have invested in the enterprise and what personal attention they will probably pay to the actual work of the company.

Don't be afraid to ask questions. If the company is organized on a business basis and for the purpose of developing what it believes to be good mining property, its officers and stockholders will be willing to give you any reasonable information.

The old days when a man had to strike a "bonanza" to make money out of the mining business, have passed. New methods, new machinery, new processes of reduction and extraction, greater knowledge of the geological formations making mining more of a "certainty," with greater possibilities of profit.

Some of the greatest mechanical engineering and chemical experts in the country are now to be found in the ranks of the "miners."

The trend of large capitalists towards mining investments has been very noticeable during the past few years and as mining becomes a better known industry, the interest in mining will more and more occupy the attention of the great rank and file of investors.

Mining investments as a rule, if judiciously made, prove profitable above the average of other investments, but don't take any "shots" or "flyers."

Make your investments on a business basis and investigate before you invest.

GOLDFINCH IN GOOD ORE

PATIENT PROSPECTING MEETS
WITH RICH REWARD.

TWO SHIFTS TO BE PUT ON AND
ORE SHIPPED.

(Special to The Daily News)

Greenwood, May 12.—One of the claims on the bench above Twin creek to the south, and the first claim encountered after leaving Greenwood, is the Goldfinch. Part of the E. P. U. tramway is on the Goldfinch ground. Underneath the ore shoot at the foot of the E. P. U. tramway, the late owners of the Goldfinch ran a tunnel along an outcrop and after going in for about 40 feet, lost the lead. In November last Mr. E. F. Madden, of Chicago, one of the principal stock holders in the Providence company, bought the Goldfinch and under the direction of his nephew, William Madden, is now engaged in systematically opening it up with a view to making large shipments of ore. A tunnel has been started about 50 yards west of the old tunnel and is now on a most promising looking lead about 10 inches wide and carrying good values in gold and silver. In the old tunnel Mr. Madden put in a couple of shots to the right about six feet from the face and has uncovered a good vein of quartz which he believes is a continuation of the vein from the main shaft which was sunk by the old owners on the hill 500 feet above and 500 feet to the southwest. The vein in the shaft divided, and a great deal of patient prospecting has been done by the present owner, with a view to find the trend of these veins, the result being that both have been struck, apparently, one in each tunnel.

Your correspondent has been all over the claim and can vouch for the amount of open trench work which has been done, and on Thursday morning inspected both tunnels and saw the leads, by kindly permission, and under the personal direction of Mr. Madden himself. During conversation Mr. Madden said that it was his intention now that he had found the leads, to run both tunnels along their respective leads, stope out the ore as they go along and eventually raise 400 feet to the bottom of the old 100-foot shaft. The new tunnel is now in about 15 feet and is only a few feet from the road which is used by the E. P. U. to haul their ore from the ore shoot at the foot of the tramway. There is little doubt but that the Goldfinch will soon become a shipping property as two shifts of men are to be at once engaged for each tunnel and the work prosecuted with the utmost vigor.

Both the leads are in porphyry walls, well defined, and not at all hard drilling. In this camp almost invariably when tunneling along a vein the workings are on the hanging wall, the ore being left on the foot and afterwards broken down on to canvas in order to save every pound. A car of Goldfinch ore shipped from the upper workings some time ago, yielded \$5000, or \$200 per ton. It is expected that all the work done in the future will more than pay for itself, and most probably yield the owner a handsome profit.

The shipment referred to was made by Messrs. Phil McDonald of the Elkhorn, and James Stuchland.

PREDETERMINATION OF SEX

Berlin, May 12.—The question of the pre-determination of sex received much attention at the medical congress which has just concluded its session at Wiesbaden. In a paper on the subject, Dr. Well, a celebrated specialist of Schwabach, asserted that the class of food eaten by the parent plays a great role in determining the sex of the embryo. Experiments made with bees, rabbits, pigs and cattle show that if in the nourishment the carbonaceous element predominates, more male progeny is produced; if the albuminous element predominates, there are more females. There is a constant struggle for ascendancy between the male cell and the female cell, and careful dieting, declared the specialist, can place the preponderance of influence on the one or the other side.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder dusted in the bath, softens the water and disinfects.

It will pay you to keep Chamberlain's Colic, Cholera and Diarrhoea Remedy in your house. It only costs a quarter, sold by all druggists and dealers.

BEWARE OF "WOODEN NUTMEGS."

THIS is an age of imitations!

The symbol of the period should be the "Wooden Nutmeg."

Every sincerely good and reliable article of commerce has today a score of deceptive substitutes poaching upon its market.

And, if the substitutes were as good as the originals they would not need to imitate the outward appearance of these originals, but could create a market of their own, on merit.

The Maker of a sound, and reliable article makes it sound and reliable so as to deserve, and hold, a future market.

The Maker of a substitute for that article makes it for present profit only—to trade upon the goodness of the original.

He has nothing at stake for the future, and his policy is to give you the shell without the kernel—the appearance without the value.

Some Shoe Retailers prefer selling "long-profit" shoes to selling "The Slater Shoe" which is price-controlled by the Makers.

But,—don't forget that the Slater Shoe is priced by the Makers to prevent your being over-charged when you buy them.

Look for the Slater frame and the Makers' price, \$4.00 or \$5.00 on the lining.

MICHEL ASSAULT CASE

ACCUSED HONORABLY ACQUITTED
BY JUDGE FORIN.

CHIEF COMMISSIONER PAYS A
VISIT TO FERNIE.

(Special to The Daily News)
Ferne, May 12.—Judge Forin yesterday disposed of a serious criminal case sent up from Michel. The accused was A. Derbyshire, charged on the information of Mrs. Murdoch, with having committed a criminal assault on her daughter, a girl under the age of 14 years. The accused elected for a speedy trial. Mr. Horchum appeared for the crown and Mr. L. P. Eckstein for the defence. The child, a girl of 10 years of age, was the first witness called by the crown, but before her evidence was taken she was interrogated by judge Forin as to her knowledge of the meaning of an oath and as to what punishment would be meted out to her in the next world if she told a lie. Her answers displayed such a lamentable state of ignorance of the existence of God as to draw a very scathing observation from the judge that "a good many children were brought up like so many cats or cattle with the result that charges like this arose and an immediate rush in court followed."

The evidence of the child, however, was taken, but she contradicted herself several times in giving it. The evidence is not fit for publication but after hearing several witnesses for the prosecution the crown's case closed and Mr. Eckstein intimated to the judge that he did not call any witnesses but would leave the case in his honor's hands. After hearing both counsel his honor discharged the prisoner. This case has excited a good deal of interest in Michel and on his discharge from custody the accused was met by a large number of his friends who had come down from Michel to attend the trial, and from whom he received many hearty congratulations on his acquittal. The little girl who appeared as accuser is going shortly with a younger brother to a "home" in Vancouver, where they will receive a proper training and be properly cared for.

Hon. R. F. Green arrived here Wednesday night from Cranbrook. He was met at the station by Mr. Ross, M.P.

The hillside opposite the C. P. R. station is being cleared of stumps preparatory to the making of a reservoir 80x120 feet, to be lined with concrete, and capable of holding 400,000 gallons of water.

Several capitalists are expected here from Wisconsin and Minnesota. These gentlemen are in search of timber for future speculation. They have bought timber in the east and sold it again at a large profit but a repetition of this in the eastern states is not possible on account of the scarcity of timber so they are now in search of timber where it can be more easily and cheaply procured and which will be held for a future rise in value.

A GOOD FAMILY LINIMENT

Every family should be supplied with a bottle of Chamberlain's Pain Balm. For cuts, bruises, burns, scalds and similar injuries, which are of frequent occurrence, it is the best. It soothes the wound and not only gives instant relief from pain, but causes the parts to heal in about one-third the time required by the usual treatment. As it is an antiseptic all danger from blood poisoning is avoided. Sold by all druggists and dealers.

HAS FOUND NORTH POLE

EXPLORER AMUNDSEN REPORTED
TO HAVE DONE SO.

EVIDENCE THAT HE TRAVERSED
NORTHWEST PASSAGE.

Chicago, May 12.—A despatch to the Record-Herald from San Francisco says: "The Norwegian consul here has received an order for provisions to be sent north on a whaling vessel for captain Regald Amundsen, Arctic explorer, who sailed from Norway on June 17, 1903, in an endeavor to find the northwest passage. From the fact that supplies are to be sent north by the Pacific ocean it is argued that this great quest of Arctic explorers for more than 400 years has been successful and that the explorer will soon appear on the Pacific coast. Captain Amundsen, who passed Greenland and King William's land, is said to have located the north magnetic pole and to have found the monument erected by Sir John Franklin, when that ill-fated expedition perished."

BLAMES THE JEWS

Official Account of Zlatimir Massacre Largely Exonerates Christians

St. Petersburg, May 12.—The official account of the disorders at Zlatimir says a general massacre was only prevented by the energetic measures taken by the authorities. It attributes the outbreak largely to the situation created by the Jews, and revolutionaries and elites.

"The minister of the interior has received news of cases in which Jews have insulted and even beaten women. The Christians are greatly incensed and excited. Besides this, the social revolutionists have scattered proclamations calling the Jews to a massacre is contemplated. Everything shows that the cruelties were perpetrated under the influence of the revolutionists, who are embarrassing the authorities in preventing encounters between the Jews and Christians. The governor has been instructed to urge the better classes of the Jews to persuade their co-religionists by their conduct not to excite hatred against themselves."

VICTORIA DAY IN KASLO

Great preparations are being made in Kaslo for the fourteenth annual celebration of Victoria day, May 24th. The program will include launch races between Kaslo and Nelson boats; firemen's races, including wet test and hook and ladder race; football and trap shoot ing.

A grand ball is to be held in the evening Nelson city band will be present throughout the day to discourage sweet music. Special excursions will be run from Kaslo, Sandon, New Denver and other nearby places.

Mayor Houlder is chairman of the celebration committee and C. A. Bonnor is the secretary.

YMR NEWS NOTES

(Special to The Daily News)
Ym, May 12.—R. A. Renwick, government agent of Nelson and Harry Wright, M.L.A., are here to arrange for the expenditure of money on roads and trails. Kenney McLeod, employed at the saw mill here met with a painful accident this morning. While rolling logs he slipped and broke one of the bones of his leg. He was removed to the Ym general hospital. Dr. Elliott at the Ym general hospital this morning amputated the foot of Alex. Grant of the Ym mine, necessitated by necrosis of the heel bone. The patient stood the operation well and will recover rapidly.

NAN PATTERSON IS FREE

RELEASED FROM THE TOMBS ON
HER OWN RECOGNISANCE

CHORUS GIRL LOUDLY CHEERED ON
LEAVING THE COURT

New York, May 12.—After more than 11 months in prison and three mistrials on the charge of murdering Caesar Young Nan Patterson walked from the Tombs today a free woman. As she left the building which had been her home since a few days after Young was found lying in a cab in lower New York, two thousand people greeted her with cheers, for the news that district attorney Jerome would move for her dismissal had spread rapidly. But the accused girl had but a few seconds to see and hear the demonstration before she was driven off in a carriage with her lawyer, Abraham Levy.

The news of the move to discharge Nan Patterson came rather unexpectedly to the public. It was an hour or more before noon when district attorney Jerome appeared before recorder Cowing in special sessions and announced that he desired to move the discharge of the former chorus girl on her own recognizances.

Not the least interesting of the day's event was the reunion of the former Floradora girl, with her sister, Mrs. J. Morgan Smith and her brother-in-law, J. Morgan Smith, both of whom were discharged by justice Cowing in the court of general sessions after having been held on charges of conspiracy in connection with the case. Smith was also held for contempt of court in failing to obey a subpoena to appear as a witness before the grand jury. He was fined \$500 on this charge and released. Nan Patterson herself paid the fine out of a \$300 check which had been given her by a friendly newspaper.

District attorney Jerome asked the court to free Nan Patterson in a speech, in the course of which he declared that during two trials of the girl the evidence in the possession of the district attorney's office had been presented to the court and that in both cases there had been a disagreement. He said that he did not believe that at this time in this country, another trial would result in anything else than a disagreement. Then he declared that during the last trial, he had information that the members of the grand jury had agreed that J. Morgan Smith had bought the revolver, that Nan Patterson carried it in the cab and that Caesar Young did not commit suicide. He took occasion to refute published reports as to the costs of the trials. Following this line he declared that the newspapers had made gross misrepresentations. He concluded with the motion that Nan Patterson be discharged on her own recognizance. It was then that Miss Patterson was sent for, and as a court official met her in the cell, he said: "Come on Nan, it is all right, you are going to be free."

When the girl arrived in the court room, recorder Goff addressed her: "Nan Patterson," he said slowly, "the district attorney has seen fit to recommend your discharge. I feel bound to say that I fully coincide with the decision. There is no thing that has not already been said, but let me entreat you in your future life to remember the terrible ordeal through which you have passed and to permit every action of your life to be guided by that remembrance. Good-bye," and the recorder bowed his head as he uttered the final words and closed the case.

A moment later the girl was shaking hands with her counsel. Then she walked steadily from the court room to find herself in the arms of her father, outside the door. The crowd in the corridor cheered and the police let them have their way. As she reached the street door the demonstration was taken up by a throng outside. Hurrying through the crowd, she took her place in a car, smiling and adding: "As the cab started down toward the offices of her counsel, mounted police surrounded it and kept back the increasing crowd which was threatening one of the most remarkable demonstrations ever seen at the Tombs."

In Mr. Levy's offices, Miss Patterson briefly expressed her thanks to her counsel, announced to the newspaper men that she was going to her mother in Washington and was driven to the St. Paul hotel. Then she met her sister and they took an auto ride. J. Morgan Smith told the two later and the trio dined together. Miss Patterson took a late train for Washington tonight.

A GOOD SUGGESTION

Mr. C. B. Wainwright of Lemon City, Fla., writes the manufacturers that much better results are obtained from the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy in cases of pains in the stomach, colic, cholera morbus by taking it in water as hot as can be drunk. That when taken in this way the effect is double in rapidity. It seems to get at the right spot instantly. For sale by all druggists and dealers.

NELSON'S NEWS OF THE DAY

The Canadian Bank of Commerce has opened a branch at Pentleton.

There are eight letters at The Daily News office for "F.T."; three for "J.H."; two for "H.P."; and one each for "Cook" and "Box X."

The concert of the Steel-Freeland company was repeated last evening. The attendance was only fair. The court house was the centre of attraction during the evening.

Frank Tamblin received a telegraphic message last evening containing the offer of a good position at Moscow, Idaho. He wired an acceptance and will leave Nelson this morning.

Dr. G. V. Hay, editor of the Educational Review of St. John, N.B., is a guest at the Strathcona. Dr. Hay attended the recent teachers' institute at Revelstoke and is now on his way east.

The steamer Roseland, the flagship of the Arrow lake fleet, has resumed her run from Arrowhead to Robson. The steamer has received a fresh coat of paint and made a splendid appearance on her first run.

Four certificates of assessment work were issued Friday at the mining recorder's office, to J. E. Bigham on the Moonshine and Sun Set, and to Harry Rippen on the Tona and Pearl.

G. A. Clothier, superintendent of the St. Eugene mine at Moyie, visited the Mollie Gibson mine yesterday to advise with manager Tretheway relative to the concentration soon to be put in at that property. Mr. Clothier will return at once to Moyie.

Dr. H. M. Torg, professor of physical science at McGill university, accompanied by Mrs. Torg, arrived in Nelson last evening from the coast. Dr. Torg has been lecturing at Vancouver college, which is affiliated with McGill. Dr. and Mrs. Torg will remain in Nelson a few days.

The Eva Gold Mines, Ltd., of Camborne, made a satisfactory cleanup the first of the month, according to information received from that place. It is said that the results of the mill tests of the ores which have been carried on for some time, is likely to determine the company upon an enlargement of its plant.

Camborne citizens recently held a meeting to discuss the importation of Mongolian labor at Salmo by the Kootenay Shingle company. The resolutions on that subject, adopted by the mass meeting held here in the same hall, were discussed and unanimously endorsed.

The regular monthly meeting of the University club will be held this evening at 8 o'clock in the Auditorium. The program will consist of an address by A. L. McKillop on "Education in Politics" and a general discussion. All university men and women in the city are invited to be present.

The C.P.R. announces that the Princess Victoria, the queen of the Pacific coast fleet of coasting steamers, is soon to go on the Seattle run. She will make the complete trip from Vancouver to Seattle and return daily. This will only be possible by reason of her great speed. She will leave Vancouver at noon and make Seattle during the night.

Five Chinese laundrymen who refused to connect with the city water system and pay water rates, were arrested yesterday and were before magistrate Croome for a hearing. They were represented by A. M. Johnson and P. McL. Forin. The hearing was not held, however, as city solicitor Wilson was unable to be present. The case was put over to Monday.

The dominion government work, improving the channels at the mouth of the Columbia river is progressing in good shape, and will be of the most permanent kind. A breakwater is being built of piles and matted with brush and rock that will give permanency to the structure. The work is in charge of Mark Hyatt, who is giving satisfaction to all concerned.

The tunnel that is being driven on the Silver Dollar in the Lardau mining division, to tap the lead at a depth of 120 feet vertically from the surface, is reported to be going rapidly ahead, and it is expected that very shortly the ore body will be reached. A force of men are still blasting and grading the mill site, although snow still hampers operations somewhat.

C. E. Smitheringale, who for the past five years has published The Drill at Slokan, announces in the last issue of his paper that with that issue publication ceases. The reason assigned is lack of adequate support. The Drill has served the Slokan district faithfully and has always been an important factor in keeping the mineral wealth of that section well before the public. Mr. Smitheringale intimates that he is leaving the Slokan, but does not state where next he will engage in the newspaper business. Wherever he may

GOSSIP OF GRAND FORKS

(Special to The Daily News)
Grand Forks, May 12—W. T. Hunter and associates, who recently bonded the Seattle mine, are sparing no expense in the hope of proving that property to be a shipper. The tunnel they are now running is in a distance of 175 feet and the rock is improving daily. It is the intention of the new owners to continue this tunnel in some 350 feet further if necessary, as they are de-

termined to locate the big ore body. Dick Hutchinson, an old resident of the North Fork, left today for Rossland where he will reside in the future with his family.

A couple of days ago a man in a demented condition, very poorly clad, strayed into the camp of E. Spraggett, provincial road supervisor, who was doing some work up the North Fork. Mr. Spraggett brought the man to Grand Forks and turned him over to the authorities. He is now in the city and pending an investigation. It is believed that he is the same man who was seen near the Seattle mine by Robt. Clark about a week ago.

NORTH STAR TO RESUME

The Cranbrook Herald is in possession of information to the effect that the North Star Mining company propose to commence work again on their property. This, the Herald says, is good news indeed to the people of East Kootenay, who all hold a tender feeling for that property. It will also be good news to the people to know that N. McLeod Curran will return to have charge of the work. Mr. Curran had been so long in this district that his departure was a source of universal regret and everybody will be pleased to know that he will soon be back here.

RICH STRIKE IN DAWSON

Gold in Large Quantities in Tributary of The Mayo River
Ottawa, May 12—Dr. Thompson, M.P., has received news in a letter from the Yukon of a rich strike of placer gold on Highest creek, a tributary of the Mayo river, about 250 miles from Dawson. On No. 84 below discovery, Hector Morris struck six feet of pay that will average five cents to the pan, or over \$6 to the cubic yard. Claims have jumped from a few hundred dollars up as high as \$2000 each.

VANDERBILTS IN CANADA

Have no Intention of Acquiring a Trans-continental Line
Toronto, May 12—J. Wesley Allison of New York, closely identified with the Vanderbilt interests, is in the city. He contradicted the rumor that it was the purpose of the Vanderbilt company to take steps toward acquiring a trans-continental line in Canada. "The Vanderbilts," he said "have sufficient railway interests within the dominion, and as far as I know they are not looking after any more."

MNICOLL DENIES IT

Montreal, May 12—General manager McNicoll of the C.P.R. interviewed respecting the report telegraphed from Winnipeg to the effect that the company would undertake a new plan in connection with their maintenance of ways department in the west, handing it over to a number of private contractors, who would keep the lines in order, says there is nothing whatever in the report.

ROYAL VISIT TO INDIA

London, May 12—The first class cruiser Terrible belonging to the Portsmouth reserve division, has been ordered to be prepared as a part of the escort for the prince and princess of Wales when their royal highnesses go out to India in the battleship Retown.

The latter is now at Portsmouth undergoing extensive repairs.
