CAREER HISTORY

Angus is a Professional Engineer and Professional Forester with close to thirty years of varied experience in the forest industry in British Columbia.

Over his career Angus has been responsible for Total Chance Planning and valuations of various timber tenures, valuation of stands of timber and costs of operations. He has extensive knowledge of the legislative framework and the challenges of practicing forestry in BC.

Most recently Angus was involved in the evaluation of two forest licenses for a First Nation purchase and the development and negotiation of a term sheet for that purchase. He possesses a strong knowledge of the costs, risks and opportunities of controlling and Managing a Tree Farm License as the Manager of TFL 61 for the past 14 years.

His experience includes all phases of timber project development from Forest Stewardship plans to engineering, cruising, valuation, crew management, contractor management, quality control, transportation and sales. Angus has participated in Timber supply reviews in the Mid-Coast, Mainland Coast, and Vancouver Island, being the lead for the TFL 61 TSR completed in 2019, which resulted in a timber supply increase of 13%.

One of his rewarding experiences was as lead in the successful compensation negotiation with Province over the taking of a tenure in the Mid-Coast during the implementation of the GBR Act.

Angus is a Board member for Pacheedaht Forestry Limited, the Queesto Community Forest and for BC Wood. He is also the Responsible Officer and Responsible Registrant for Canadian Overseas Permit to Practice.

PERSONAL INTERESTS

Angus' personal interests are creating new items from a number of different sources, including woodturning, lapidary (jewellery) and blacksmithing. When not creating, Angus is also a keen hunter and fisher, spending time outdoors with his extended family and grandchildren.
